Don't See a Club Near You?
You can start a NEW CLUB!

How to Join 4-H

4-H is open to all youth in 5K through their first year of college.

You can join 4-H any time of year, but the best time to join 4-H is in the fall when the 4-H year begins.

Step 1: Choose a Club. A current list of Community Clubs is listed. Your community club is your home base and involves members of a variety of ages and interests. All members attend the club general meetings, which are usually held monthly throughout the year.

How do I choose a club? Most families choose a club based on its meeting location and/or meeting day of the week. Others choose a club because they have friends in that club. There are no residency restrictions (including county) when joining a 4-H club. Families are encouraged to "drop in" on a 4-H club to check it out or contact the 4-H club general leader in charge of a club for more information.

Step 2: Select your Projects: Each member also participates in one or more projects. The 4-H project list is in this flyer. These meet on a variable schedule at other times throughout the year under the guidance of a volunteer project leader or are self determined to learn on your own. Youth in 5K- 2nd grade are in the introductory Cloverbuds project only.

Step 3: Enroll online The next step is to enroll in the Waukesha County 4-H program electronically using www.v2.4HOnline.com by registering for your club & projects.

Step 4: Dues. The current cost for 4-H membership is \$40 annually per family, and most clubs also have a small club fee. Financial assistance programs available

Step 5: Attend Meetings & Participate! Watch for emails and communications to attend your club general meetings, your project meetings, and all the many other opportunities available to our 4-H members.

An EEO/AA employer, University of Wisconsin-Extension provides equal opportunities in employment and programming, including Title VI, Title IX, and the Americans with Disabilities Act (ADA) requirements.
